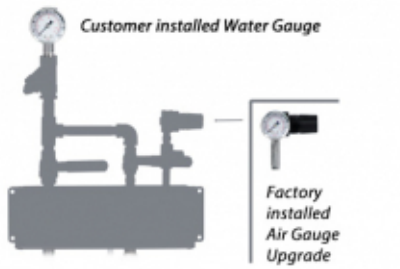
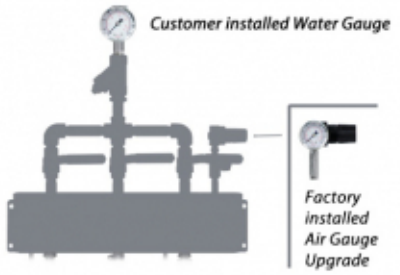
Water And Air Pressure Gauges

MODEL # 336346

OVERVIEW

Gauges display incoming water and/or air pressure to facilitate system installation and troubleshooting. Available for any city water pressure system.





Water Pressure Gauge Options
 # 336344 3/8" Inlet
 # 336346 1/2" Inlet
 # 336348 3/4" Inlet

Air Pressure Gauge
(Upgrade Only at time of order)
 # 336322 1/4" Inlet

Key Features

- Available for any city water pressure (20-125 PSI) system with incoming water or air connections
- Gauges eliminate guessing the pressure, which reduces set-up time and provides critical information for troubleshooting
- Water pressure gauges aid in metering tip selection and use of the Metering Tip Calculator
- Water pressure gauge assemblies can be installed on new or existing units, and are selected based on the size of the water inlet(s)
  - 3/8" (#336344)
  - 1/2" (#336346)
  - 3/4" (#336348)
- Air pressure gauge assembly #336322 is factory installed on new units only (specify at time of order)
- *Not* suitable for boosted or high water pressure systems (see #336340-HP)
- Other gauge configurations are available upon request
- See Lafferty city water pressure systems in Catalog 1

Includes

- Easy-to-read gauges
- Stainless steel fittings (see options for sizes)

Also Available

- Portable city water pressure gauge kit #336340
- Confirm water pressure before installing a new unit

REQUIREMENTS

City Water Pressure System with Compatible Water and/or Air Inlets	Refer to equipment diagram, or contact us

OPTIONS

Available Gauge Assemblies

Water Pressure Gauge, 3/8" Inlet	# 336344
Water Pressure Gauge, 1/2" Inlet	# 336346
Water Pressure Gauge, 3/4" Inlet	# 336348
Air Pressure Gauge, 1/4" Inlet (Upgrade Only)	# 336322

Portable Gauge Kit

City Water Pressure/Flow Test Kit	# 336340
