

Rinse / A-25 Airless Foam Hose Drop Station

MODEL # 915918

OVERVIEW

The Rinse/A-25 Airless Foam Hose Drop Station is a combination medium volume foam applicator for projecting foaming chemicals on to any surface up close or at a distance and for rinsing, without compressed air. This venturi injection system uses city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. The solution then flows through the discharge hose to the "airless" foam wand which draws in atmospheric air to create and project wet, clinging foam at distances up to 6 feet. Rinse at full pressure through a separate hose and unique, powerful 4-hole nozzle.

Key Features

- No compressed air required
- Designed for foaming & rinsing medium to large surfaces
- Projects wet, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Projects foam up to 6' (depending on water pressure)
- All stainless steel and polypropylene wetted components ensure years of trouble-free performance
- Industrial-strength design holds up in tough environments
- Available without a rinse function (#970525)
- See other configurations of Lafferty city water pressure foamers in [Catalog 1](#)
