

Portable 5 Gallon Hyper SS Foamer

MODEL # 917805

OVERVIEW

The Portable 5 Gallon Hyper SS Foamer features an all stainless steel cart assembly and is a foam applicator for quickly projecting foaming chemicals on to any surface up close or at a distance. This stainless steel venturi injection system uses high water pressure (400 - 1000 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. Rich, clinging foam is created by injecting compressed air into the solution to greatly increase volume and coverage ability. The foam is then projected through the foam hose, wand and fan nozzle at distances up to 13 feet.

Key Features

- Stainless steel foamer body for maximum durability and chemical resistance
- Projects a substantial volume of rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Fan pattern nozzle for quick coverage (up to 13' range)
- Covers up to 500 sq ft (46.5 sq m) in 1.5 minutes
- Optional zero degree nozzle for increased foam throw
- Adjustable foam consistency (wet/dry)
- Chemical resistant wetted components ensure years of outstanding performance with minimal maintenance
- Industrial-strength design holds up in tough environments
- Available with a 20 gallon chemical concentrate tank (#917820)
- See other high pressure applicators in [Catalog 3](#)
