

W-20SS Chemical / Rinse Spray-All With Rollover Nozzle

MODEL # 918056

OVERVIEW

The W-20SS Spray-All is a combination spray/rinse applicator for applying chemical solutions to a variety of surfaces at 3.11 GPM @ 700 PSI and for rinsing. This stainless steel venturi injection system uses high water pressure (400 - 1000 PSI) to draw and blend chemical concentrate into the water stream using precision metering tips. The accurately diluted solution is then projected through the discharge hose, trigger gun, wand and fan nozzle. The rollover nozzle assembly adds the convenience of alternating between spraying and rinsing without having to return to the wall mounted unit.

Key Features

- Designed for spraying down and rinsing medium to large sized surfaces and objects
- Projects a chemical spray in a fan pattern for quick application (3.11 GPM @ 700 PSI)
- Rinse without returning to the unit by simply rotating the rollover nozzle to the rinse nozzle
- All stainless steel components ensure years of outstanding performance with minimal maintenance
- Industrial-strength design holds up in tough environments
- Available without the rinse function (#918054)
- See other Lafferty high water pressure chemical applicators in [Catalog 3](#)

Includes

- Stainless steel mounting bracket
- Machined stainless steel injector body
- 20 color-coded precision metering tips to set dilution ratios
- 50' discharge hose, trigger gun and wand
- Rollover nozzle assembly with spray & rinse fan nozzles
