455 1-Way Fogger

MODEL # 950201

OVERVIEW

The 455 1-Way Fogger is a dry mist sprayer that uses compressed air (17.5 CFM @ 80 PSI) and venturi action to draw ready-to-use chemical solution from a nearby container and project it up to 35 feet. The adjustable output can wet surfaces at close range or spray mist (fog) into the air to cover exposed surfaces and penetrate hard-to-reach areas.

Key Features

- Atomizes and sprays chemical solutions using only compressed air
- Venturi action draws pre-diluted chemical from a nearby container
- Projects up to 35'
- Dry fog (mist) fills the air and covers exposed surfaces with chemical, including hard-to-reach areas
- 455 foggers produce drier output, without adjustments, compared to other fogger series (633, 305, etc.)
- Optional metering tips can further reduce chemical usage and output wetness
- · Can be mounted or used as hand-held fogger
- Chemical resistant polypropylene construction ensures durability and years of outstanding performance
- See Catalog 7 for hand held, permanently mounted and portable foggers
- Use the Lafferty Fogger Planning Tool to design the optimal fogging system for any facility

Includes

- Air ball valve
- Machined polypropylene fogger body
- · Metering tip holder
- 6' chemical suction tube and strainer
