

Portable WR-1 Spray/Rinse W/ Pistol Grip Gun

MODEL # 975186

OVERVIEW

The Portable WR-1 Spray/Rinse System is a combination medium volume chemical spray applicator featuring a rinse mode and an all stainless steel cart assembly. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. The solution is then projected through the discharge hose, pistol grip gun and recessed fan nozzle as a uniform spray. Close the chemical ball valve and open the rinse valve to rinse at full pressure.

Key Features

- Designed for spraying down medium to large sized areas
- Projects a medium volume chemical spray and a full pressure rinse
- Fan pattern nozzle for fast coverage
- Chemical resistant components ensure years of outstanding performance with minimal maintenance
- Use it where 35-125 PSI water is available
- Water pressure gauge eliminates guessing, reduces set-up time, and helps with troubleshooting
- Available as a Foam/Rinse system (#975188)
- See other configurations of Lafferty Foam/Rinse/Spray systems in [Catalog 1](#)

Includes

- All stainless steel 2-wheel cart with non-marking tires
- Stainless steel integrated hose rack
- Stainless steel, round, 5 gallon jug rack (square optional)
- Machined polypropylene manifold and injector body
- Easy-to-read pressure gauge for incoming water
- Ball valves for alternating between spray and rinse
- 20 color-coded precision metering tips to set dilution ratios
- 50' discharge hose, ball valve and insulated pistol grip gun
