

Compact Foamer Spreader Nozzle

MODEL # 180325

OVERVIEW

The Compact Foamer Spreader Nozzle™ slides on to the end of a Model 25 Compact Airless Foamer (and similar variants) to create a wider foam pattern for more efficient close-range foaming.

Key Features

- Spreads the foam output to create a wider foam stream
- Allows for more efficient coverage when foaming at close-range
- Easily slides on to the end of the foam wand
- Remove it for longer range foaming
- The width of the foam stream with the Spreader Nozzle™ varies based on water pressure - higher water pressure creates a wider fan pattern
