

Liberty PRV LC Foamer

MODEL # 941351PRV

OVERVIEW

The Liberty PRV LC Foamer is a medium volume venturi foamer designed for facilities with low or fluctuating water pressure. Liberty PRV models connect to standard water pressure from 20 to 80 PSI. A Pressure Reducing Valve lowers the incoming water pressure before an air pump boosts the water pressure and maintains consistent 60 PSI output. The lockable, stainless steel cabinet protects components, including the venturi foamer body, which draws and blends chemical concentrate into the water stream to create an accurately diluted solution. Compressed air is injected into the solution to greatly increase its volume and coverage ability as rich, clinging foam that is projected through the hose, wand and nozzle at distances up to 12 feet.

Key Features

- Overcomes problems associated with very low or widely fluctuating water pressure - great for well water
- Dilutes concentrated chemical "on-the-fly"
- Regulated water flow extends pump life and ensures consistent output
- Cost-effective Flojet AODD "booster" pump supplies the water pressure required by the LC Foamer
- No chemical passes through the pump
- Projects a medium volume of rich, clinging foam which increases chemical contact time and effectiveness
- Fan pattern nozzle with up to 12' foam throw
- Covers up to 500 sq ft (46.5 sq m) in 2 minutes
- Adjustable foam consistency (wet/dry)
- Chemical resistant wetted components ensure durability and years of reliable service
- Available with 2 or 3 chemical pickups (#941352PRV, 941353PRV)
- See other air-operated foamers and sprayers in [Catalog 4](#)
