

2-Hose Uni-Body 315 Sanitize / Rinse - LV Foam System

MODEL # 975650

OVERVIEW

The 2-Hose Uni-Body 315 Sanitize / Rinse - LV Foam System is a three function cleaning system with a low volume foamer. The venturi injector uses standard city water pressure (35 - 125 PSI) to draw two chemical concentrates into the water stream and create accurately diluted solutions. Compressed air is injected into the foaming solution to greatly increase volume and coverage ability, and the foam is projected through the dedicated foam hose and fan nozzle at distances up to 9 feet. Sanitizer solution is projected as a fan pattern spray at the lean ratios required for no-rinse sanitizing in food plants. Rinse through the sanitizer hose and nozzle, or use an optional more powerful rinse nozzle.

Key Features

- Designed for precision foam application, and to rinse and sanitize medium to large surfaces and objects
- Dedicated foam hose for incompatible chemicals
- Projects rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- Fan pattern foam nozzle (up to 9' range)
- Covers up to 500 sq ft (46.5 sq m) in 4.5 minutes
- Adjustable foam consistency (wet/dry)
- Dilutes concentrated sanitizers to the lean ratios required for no-rinse applications in food plants
- Sanitizer is projected as a high volume, coarse spray
- Rinse through the sanitize hose and nozzle, or use an optional quick disconnect rinse nozzle to reduce volume and project a more forceful rinse
- The Uni-Body design is compact, cost-effective and easy to maintain
- Stainless steel and polypropylene components ensure years of trouble-free performance
- Available higher foam/sanitize flow rates (#975654)
- See other city water pressure foamers in [Catalog 1](#)
