

UPGRADE: Kalrez, ATEX Pump (Transfer Systems)

MODEL # 941600-ATEX

OVERVIEW

The ATEX Pump Upgrade must be purchased with a compatible Transfer System, which will fill any size container with chemical concentrate or ready-to-use solution. The upgrade substitutes standard materials for all-EPDM hoses and an ATEX-approved FloJet air pump with Kalrez diaphragms, which are suitable for many solvent/alcohol applications. Transfer Systems draw chemical from bulk containers and dispense it into any other container through a 15 foot discharge hose and trigger gun.

Key Features

- This is an upgrade for Transfer Systems with Pump #710757S (FloJet G57, Santoprene)
- Suitable for solvent/alcohol applications and applications requiring ATEX approval
- This part number must be specified at the time of purchase with a compatible Transfer System
- Order (1) upgrade per pump for Transfer Systems with multiple pumps

Includes

- EPDM suction and discharge hoses
- ATEX-approved pump with Kalrez (FFKM) diaphragms

APPLICATIONS

- Chemical Transfer and Dispensing
- Applications Requiring ATEX Approval
- Solvent/Alcohol Transfer
- Parts Washers
- Ink Transfer
- Car Wash Systems
- Dairy
- Food & Beverage
- Hatchery
- Industrial
- Janitorial/Sanitation
- Metal Processing

REQUIREMENTS

Transfer System with Pump #710757S

Chemical Concentrate or Ready-to-Use Solution
Compressed Air up to 4 CFM per pump
