Ultimate Wash System 6

MODEL # BLU47

OVERVIEW

The Blue Mule Ultimate Wash System 6 is a wash & rinse system for applying up to 6 animal bathing products and rinsing through the same hose. This venturi injection system draws concentrated product from any sized container, mixes it with water and projects the accurately diluted solution through the fur-penetrating 5-hole spray nozzle. Use the ball valves to switch between products and simply close the product ball valves and open the rinse valve to spray fresh water. The Ultimate Wash System 6 is designed for animal bathing, but has countless other applications. This heavy-duty and easy-to-use system will outperform and outlast the competition through superior design and materials.

Key Features

- Designed for professional pet grooming, but great for a variety of cleaning jobs
- In product application mode, the unique 5-hole nozzle projects a fur penetrating spray
  - Shampoo (or other grooming product) is diluted and applied at 2.3 GPM when using a 40 PSI water supply
  - Switch between up to 6 different grooming products, or various dilution ratios of the same products
  - Purchase the *optional* A-50 Airless Foam Wand to replace the 5-hole nozzle and apply product as foamy lather instead of liquid spray (Foam Wand not included with this system)
- Apply a clean water rinse using the 5-hole nozzle. Just close the product valves and open the rinse valve
  - Rinse flow rate of 5 GPM (when using a 40 PSI water supply)
  - Partially close the rinse valve to "feather" the spray and apply more or less pressure as needed
- The dilution ratio is controlled with precision metering tips to eliminate manual blending and save money on grooming products
- Achieves many common shampoo and conditioner dilution ratios such as 16:1, 32:1, and 50:1
- Draws concentrated product directly from any nearby container
- Does not require a specific brand of grooming product so the user is free to use their favorite shampoos
  - Some highly concentrated and viscous specialty shampoos are designed specifically for hand application, consult the shampoo manufacturer for details
- Made of industrial-strength, chemically resistant, machined polypropylene and requires nearly no maintenance over years of reliable performance

Includes

- 10' water inlet hose
- (6) 6' chemical suction tubes with strainers
- 2 sets of 20 color-coded precision metering tips to set dilution ratios
- Machined polypropylene injector body
- Product selection / rinse setting ball valves
- 10' discharge hose
- 5-hole nozzle

REQUIREMENTS

Chemical Concentrate

Water

Temperature	up to 160°F
Pressure	40 - 125 PSI
Flow	2.3 GPM @ 40 PSI
Supply Line	1/2" ID

Hose

Discharge	1/2" ID x 10'

Nozzle

Shampoo/Conditioner and Rinse	5-Hole Nozzle

Dilution Ratio Range @ 40 PSI

Spray	526:1 to 7:1

OPTIONS

Stainless Steel Hose Racks

Small Stainless Steel Hose Rack	# 224145

Stainless Steel Jug Racks

1 Gallon Round/Square	# 224200
1 Gallon Round/Square Locking	# 224200-L

Safe Flow Lid™ for 1 Gallon Jugs

Lid, Suction Tube, and Strainer	# 709101

Optional Foam Wand for Rich, Clinging Foam

Airless Foam Wand	# BLUE-528
