

1-Way FPV-PD Concrete Foamer

MODEL # 933602-V

OVERVIEW

The 1-Way FPV-PD Concrete Foamer is a foam applicator for projecting highly corrosive chemicals such as those used to remove concrete and for aluminum brightening. This acid-resistant system uses a cost-effective Flojet air-operated, double-diaphragm pump to draw ready-to-use acid solution from a static tank and inject compressed air to greatly increase volume and coverage ability. Rich, clinging foam is projected through the hose, wand and fan nozzle on to any surface.

Key Features

- Cost-effective Flojet AODD pump with Viton diaphragms
- Draws pre-diluted chemical from a static tank
- Projects rich, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over-application by providing visual assurance of coverage
- The foamer body optimizes the volume and produces the ideal amount of foam to avoid excessive run-off
- Fan pattern nozzle for quick coverage
- Adjustable foam consistency (wet/dry)
- Corrosion resistant wetted components ensure durability and years of reliable service
- Available for 2 chemicals or dilution ratios (#933604-V)
- See other Lafferty acid sprayers and foamers in [Catalog 8](#)

Includes

- Chemical resistant plastic enclosure
- Air inlet ball valve and regulator/filter
- Flojet 1/4" AODD pump with Viton diaphragms
- Machined polypropylene pump-fed foamer body
- 50' discharge hose, PVC ball valve, polypropylene wand and fan nozzle
